### A2B-online

*A2B-online* is a logistics service provider for container and trailer transport between the European Continent and the UK. With 400+ colleagues and owned assets (2,600 containers including 200 reefers, 500+ trailers, a barge, a train, 200 trucks, and 7 vessels), we provide customers with daily flexible services, combining personal contact with smart digital solutions. We handle over 300,000 shipments annually.

Founded in 2006, A2B-online operates from multiple locations: trailer activities are organized from our headquarters in Hazerswoude-Dorp; container operations from Moerdijk, where our own shipping line is based. We also operate from UK offices in Ipswich and Mold, and from Wroclaw in Poland.

### BTT Multimodal Container Solutions

BTT Multimodal Container Solutions BV is a leading family business specializing in efficient and reliable container transport by barge, train and truck. From strategically located terminals in Tilburg, Bergen op Zoom and Rzepin, BTT offers full-service solutions in the field of multimodal container transport, both nationally and internationally.

#### Multimodal Transport Solutions

With its own barge and rail terminals, BTT maintains highly frequent connections with the seaports of Rotterdam and Antwerp. Thanks to this multimodal approach, 30 million kilometers of road transport are replaced by rail and inland waterway transport each year. For international rail transport, BTT offers direct train connections to destinations in Eastern Europe and China. Its own rail terminal in Rzepin, Poland, and the office in Chengdu, China, ensure reliable and fast handling of these goods flows.

## Services and Facilities

In addition to transport, BTT offers a wide range of additional logistics services, including:

- Container storage and handling: Modern facilities for safe storage and efficient transshipment of containers.
- Container storage and handling: Modern facilities for safe storage and efficient transshipment of containers. • Cross-docking: Fast transit of goods, which ensures minimal storage and fast deliveries.
- Customs clearance: Support for all customs formalities with AEO-certified processes.
- Digitisation: Efficient, paperless logistics processes are being worked on, including via e-CMR and customer portals.

## CCT

CCT is a trimodal hub in Europe. With terminals in Moerdijk and Alphen aan den Rijn, Combined Cargo Terminals offers extensive facilities for the transport and transshipment of containers, breakbulk and project cargo. A strategic hub between Rotterdam and Antwerp. Stevedores through and through who think in solutions.

Short lines, clear communication and a flexible approach are characteristic of our working method. CCT offers you the capacity, knowledge and expertise for every logistical question. Always at competitive rates. Our employees are well-trained and are always ready for you. From Alphen aan den Rijn and Moerdijk we connect the European hinterland with destinations worldwide.

## KS Project Logistics

*KS Project Logistics* is a logistics provider based in Moerdijk, the Netherlands, specializing in tailor-made logistics solutions focused on complex and oversized cargo.

Key services include:

- **Warehousing and storage:** Flexible storage with pallet racks and space for goods from 10 cm to 20 meters.
- **Transport and distribution:** National and international transport.
- **Transshipment and lashing:** Handling of oversized goods in containers or on flatracks.
- **Value Added Services:** Repackaging, order picking, quality control.
- **On-site management:** Coordination at locations like construction sites.
- **Cross-docking and transport to the UK and Ireland.** Efficient transit of goods without long-term storage.

The company has experience in transporting various products, from steel and fragile goods such as glass and wine to agricultural machinery and air compressors. This versatility stems from their expertise in handling fragile materials.

KS Project Logistics is located at Graanweg 17 in Moerdijk, strategically located between the ports of Rotterdam and Antwerp. The modern distribution centres cover approximately 22,000 m<sup>2</sup> with equipment that offers the possibility of lifting 30 tons.

## OverslagBedrijf Moerdijk (OBM)

*OBM* operates 3 terminals in Moerdijk covering a total of 9.5 ha with 9 bulk warehouses and 5 ship berths. These are OBM-North, OBM-East, and OBM-West. OBM handles various dry bulk goods and general cargo (e.g., ores, minerals, building materials, logs, steel products), as well as contaminated materials (e.g., recycling wood, glass, rubber, scrap). OBM can arrange onward sea, inland waterway, rail, or road transport.

## VDH Company

*VDH* The Freight Managers. Progressive. Decisive. Warm-hearted.

In our view, everything in life is on its way to somewhere. Whether it is people, companies or goods. Making this journey is much more than a necessary move. We see this journey as an opportunity to add value. A way to arrive at your destination richer than when you left.

VDH Company arranges your move from A to B, but also your journey from A to Z. From the very first forwarding activities to the careful delivery at the final destination or in our warehouse. From sea freight and import to complete customs clearance, quality control, repacking and conditioned storage. We ensure that everything turns out well, regardless of what is involved.

As a medium-sized player in the market, we offer the best of both worlds. Large enough to offer all the services and facilities that can be expected from a professional transporter. Small enough to be flexible and to switch quickly. We work in small teams with diverse specialisms.

## Vepco Transport B.V.

*Vepco Transport B.V.* is a dynamic logistics service provider. From our strategic location on the Moerdijk, we are building a future-oriented transport hub that focuses on sustainability, innovation and efficiency.

We offer customized container transport and make smart use of, among other things, break chassis, LZVs, genset and tipper chassis. With a modern fleet of more than 80 trucks, 10 terminal tractors and approximately 35 permanent charters, we guarantee flexibility and reliability for our clients.

Our strength lies in:

- Smart and sustainable transport of containers, including sideloaders and reefer solutions.
- Full digital integration of route planning, tracking and documentation.
- Storage and transshipment via our sister company Containerplein on the Moerdijk, Antwerp and Maasvlakte.
- Specialist FYCO support, gas measurements, ventilation and reefer connections.

Vepco Transport is ready for the future – efficient, connected and always on the move.
